

Javascript: The Other Parts

We've covered the "crucial" parts of JavaScript in this course, but there are some trickier things I deliberately omitted until now.

Those topics are: Closures, Hoisting, and Object Oriented Programming. I decided not to include those topics early on with the rest of JavaScript because they can be extremely confusing and discouraging to new developers. Now that you have some solid experience with the fundamentals of JavaScript, learning these topics should be slightly easier(they're still pretty confusing at first though!)

I plan on making this it's own bonus video section, but until then, here are some of my favorite resources that I often recommend to my students:

EVERYTHING

[JAVASCRIPT ALLONGE](#) - A fantastic FREE ebook. READ THIS BOOK!!! It covers all of the above topics plus more interesting and tricky parts of JS. Highly, highly recommended.

HOISTING

[MDN: Hoisting](#)

[JS Scoping and Hoisting](#)

[TutsPlus: JS Hoisting Explained](#)

CLOSURES

[MDN: Closures](#)

[Stack Overflow: How Do Closures Work?](#)

[SitePoint: JS Closures Demystified](#)

OBJECT ORIENTED PROGRAMMING (OOP

[MDN: Introduction to Object-Oriented Javascript](#)

[SitePoint: JS OOP Part 1](#)

EloquentJS: Chapter 8

TutsPlus: The Basics of Object-Oriented JS
